

# VINIT YADAV

## Senior .NET Full Stack Developer | C# | ASP.NET Core | React.js | Azure | Microservices

Noida, Uttar Pradesh, India | +91 9565231284 | Vinityadav4250@gmail.com | linkedin.com/in/vinit-yadav-21ba641a5 | github.com/vinityadav

---

### PROFESSIONAL SUMMARY

Results-driven Senior .NET Full Stack Developer with 4 years of experience designing, developing, and deploying scalable enterprise applications using ASP.NET Core, C#, .NET Core Web API, Entity Framework Core, and React.js with Redux and TypeScript. Proven expertise in REST API development, Microservices architecture, JWT/OAuth 2.0 Authentication, SQL Server optimization, and Azure cloud deployment within the Insurance domain. Skilled in CKYC Integration, Payment Gateway Integration, and third-party API integrations for vehicle insurance quote systems. Strong background in Clean Architecture, SOLID Principles, Repository Pattern, Design Patterns, Dependency Injection, and CI/CD pipelines using Azure DevOps and GitHub. Adept at production support, debugging, performance optimization, and Agile/Scrum delivery, consistently improving API response times and system reliability for high-volume enterprise platforms.

### CORE COMPETENCIES

- Full Stack Development (.NET Core + React.js)
- REST API & Microservices Architecture
- Entity Framework Core & LINQ
- SQL Server Optimization & Stored Procedures
- JWT Authentication & OAuth 2.0
- Azure Cloud & Azure App Services
- CI/CD with Azure DevOps & GitHub
- Insurance Domain Solutions (CKYC, Vehicle Insurance APIs)
- Payment Gateway Integration
- Clean Architecture & SOLID Principles
- Design Patterns & Dependency Injection
- Caching & Redis
- Agile/Scrum & SDLC
- Unit Testing, Debugging & Code Review
- Production Support & Performance Tuning

### TECHNICAL SKILLS

**Languages & Frameworks:** C#, .NET Core, ASP.NET Core, .NET Framework, RESTful Web API, Microservices, LINQ

**Frontend:** React.js, Redux, JavaScript, TypeScript, HTML5, CSS3, Bootstrap, CoreUI

**Database:** SQL Server, Entity Framework Core, ADO.NET, Stored Procedures, Query & Performance Optimization, Redis Caching

**Cloud & DevOps:** Microsoft Azure, Azure App Services, Azure DevOps, CI/CD Pipelines, IIS, Git, GitHub

**Security:** JWT Authentication, OAuth 2.0, Role-Based Access Control (RBAC), Authentication & Authorization

**Architecture & Practices:** Clean Architecture, Repository Pattern, Design Patterns, Dependency Injection, Middleware, SOLID Principles, Object-Oriented Programming

**Tools & Methodologies:** Postman, Swagger, Visual Studio, Git, Agile/Scrum, SDLC, Unit Testing, Debugging, Code Review, Production Support

### PROFESSIONAL EXPERIENCE

#### .NET Full Stack Developer — EbixCash

Noida, India | September 2022 – Present | Tech Stack: ASP.NET Core, C#, .NET Core Web API, Entity Framework Core, React.js, SQL Server, MySQL, JWT, OAuth 2.0, Azure

- Architected and developed 15+ enterprise-grade RESTful APIs and Microservices for insurance and CRM platforms using ASP.NET Core and C#, supporting 50,000+ daily transactions.

- Engineered secure authentication and authorization modules using JWT and OAuth 2.0, implementing Role-Based Access Control (RBAC) and reducing unauthorized access incidents by 100%.
- Integrated 10+ third-party APIs including CKYC Integration, Vehicle Insurance Quote APIs, and Payment Gateway Integration, improving policy issuance turnaround time by 30%.
- Optimized SQL Server database performance through Stored Procedures, indexing, and query tuning, reducing average API response time by 40%.
- Implemented server-side pagination, filtering, caching, and validation using Entity Framework Core and LINQ, improving application load performance by 35%.
- Built and maintained React.js + Redux admin panels with TypeScript, HTML5, CSS3, and Bootstrap/CoreUI, enhancing UI responsiveness and reducing page load time by 25%.
- Applied Clean Architecture, Repository Pattern, Design Patterns, Dependency Injection, and SOLID Principles to ensure maintainable and scalable codebases.
- Configured CI/CD pipelines using Azure DevOps and GitHub, automating build and deployment processes and cutting release cycle time by 20%.
- Deployed and managed applications on Azure App Services and IIS, ensuring 99.9% uptime for production environments.
- Resolved 100+ critical production issues through root-cause analysis, debugging, and performance monitoring, ensuring minimal downtime.
- Collaborated with cross-functional teams of 8+ members in Agile/Scrum sprints, conducting code reviews and unit testing to maintain high code quality.

## PROJECTS

### CRM Revamp & Lead Management Platform — ASP.NET Core, C#, Entity Framework Core, SQL Server, JWT

January 2025 – Present

- Developed backend Microservices for CRM modules including lead management, ticketing, and user management, supporting 500+ concurrent users.
- Implemented JWT-based RBAC authentication, improving data security and access control across modules.
- Added server-side pagination, filtering, and validation features, reducing data retrieval time by 30%.

### Life Insurance Management System — .NET Core, REST APIs, SQL Server, React.js

September 2024 – Present

- Built policy administration, customer management, and claims processing modules handling 10,000+ active policies.
- Integrated third-party insurance APIs for real-time policy issuance, CKYC verification, and customer data sync.
- Improved system reliability to 99.5% uptime through optimized backend logic and SQL query tuning.

### Motor Insurance Platform (4W/2W) — ASP.NET Core, C#, MySQL, REST APIs, Payment Gateway

September 2022 – Present

- Developed Vehicle Insurance Quote APIs and policy issuance/renewal modules used by 20,000+ end customers.
- Integrated multiple insurer APIs and Payment Gateway Integration for real-time premium calculation and online payments.
- Ensured secure data handling and API response validation, reducing transaction errors by 25%.

## KEY ACHIEVEMENTS

- Reduced average API response time by 40% through SQL Server query optimization and Stored Procedures.
- Delivered 15+ Microservices-based RESTful APIs supporting high-volume Insurance domain transactions.
- Successfully implemented CKYC and Payment Gateway Integrations, improving policy issuance speed by 30%.
- Maintained 99.9% production uptime while resolving 100+ critical issues across enterprise platforms.
- Recognized for consistent delivery in Agile/Scrum environment with zero missed sprint commitments.

## EDUCATION

**Bachelor of Technology — Mechanical Engineering** | ITS Engineering College, Greater Noida | 2023 | GPA: 7.0  
**Intermediate (12th)** | Gandhi Inter College, Uttar Pradesh | 2019 | 70%

**High School (10th)** | Adarsh Kisan Inter College, Uttar Pradesh | 2017 | 80%

## **ADDITIONAL INFORMATION**

**Notice Period:** Immediate / Negotiable | **Open to:** .NET Full Stack Developer, Software Engineer, Senior Software Engineer, Backend Developer roles
